- **Annual management fee of the investment basket:** 0.15%

Investment strategy

The Balanced Portfolio Management Service is a combination strategy whose objective is to exceed the fixed income investment return in the long run, with a lower risk level than what the equity markets hold.

Achieving the investment objective and managing investment risk is carried out through active portfolio management between various investment objects, typically investment baskets and investment funds, but also other investment instruments, such as equities, alternative investments and fixed income investments can be used to achieve the investment objective.

The strategic weight of other than fixed income investments is close to 50 per cent in the long run. The weight of asset classes other than fixed income investments can, however, be adjusted between 0 and 100 per cent according to the market situation, which in the short term means that the share of fixed income, equity and alternative investments can vary quite a lot.

Targeted investors

The investment basket suits investors who seek a higher return than those for fixed income investments in the long term and accept the risk of losing capital and returns. The recommended investment period is at least 3 years.

Calculation of the investment basket's value

The value of the investment basket is calculated on each banking day at the current market values of the investment objects it contains. The value of the investment basket is available on Mandatum Life's website.

The value of redemptions made from the investment basket will be determined per order in accordance with the market situation at the time of redemption.

Risk profile of the investment basket

The investment basket has a fairly high return risk and capital risk. The return expectation is approximately the average interest income for equity investments. Return and capital risk mean that investors may lose the capital that they have invested as well as the returns in part or in full.

The value of the investment basket is calculated regularly at the current market values of the investment objects it contains. Changes in the equity, foreign exchange and interest rate markets are reflected in the value of the basket, which can vary substantially in the short term. The investment basket is not covered by the Investors' Compensation Fund or the Deposit Guarantee Fund.

Fees and expenses of the investment basket

The annual management fee of the investment basket is 0.15%. The investment basket's management fee and possible other expenses associated with investments, including safe custody expenses, subscription and redemption fees, trading costs and any taxes and other public charges will be

charged from the value of the investment basket when the value of the unit is calculated; they will not be charged separately.

Risks and observations related to unit-linked insurance policies

This brochure does not provide exhaustive information on the Mandatum Life Portfolio Management Service Balanced investment basket or the associated terms and conditions. Prospective policyholders must carefully familiarise themselves with the investment basket's rules, the insurance policy's and investment basket's terms and conditions, price lists, product information and brochures before purchasing or changing an insurance policy or selecting or changing investments.

The performance of unit-linked insurance policies is dependent on the performance of the investments (such as investment baskets) selected by the policyholder. The value of the investments may rise or fall, and the policyholder bears the risk of losing, either in full or in part, the value of the investment object appended to an investment insurance policy or capital redemption contract.

Policyholders should note that the

past performance of investments is no guarantee of future returns. Investors may lose the assets they have invested in the investment basket in part or in full. The information and calculations concerning the returns, expenses and fees for investment objects do not take into account the expenses for the insurance policy.

Policyholders independently decide on the selection of investment objects in accordance with their own investment objectives, and bear the risk of a decrease or loss in the value of the insurance savings. Neither Mandatum Life Insurance Company Limited nor its agents are liable for the performance of the investments.

Information on investments and related matters is supplied for information purposes only and cannot be construed as a recommendation to subscribe for, hold or exchange certain investments, or to carry out any other actions affecting the performance of the insurance.

The investment basket is an investment object owned by Mandatum Life that may be linked to a unit-linked life insurance policy or capital redemption contract.

The insurance policy or capital redemption contract is granted by and the investment basket is offered by
