- **The annual management fee for the investment basket is** 1.20%.

Investment basket

The investment basket is an investment object owned by Mandatum Life Insurance Company Limited (hereinafter "Insurance Company") that may be linked to unit-linked life insurance and capital redemption contracts (hereinafter collectively "Contract") specified by the Insurance Company, where the assets of the investment basket are invested according to the investment strategy detailed below.

The investment basket does not distribute its return. Instead, any eventual return increases the value of the unit.

The return on the investment basket depends on the performance of the assets in the investment basket.

The Insurance Company defines the rules for the investment basket.

Unless otherwise provided in these rules, the regulations concerning investment objects in the Contract terms and conditions apply to the investment basket. Further information concerning the investment basket and its investment object is available by request from the Insurance Company.

The investment strategy of the investment basket

The Mandatum Life Pension+ investment basket is a combination strategy whose long-term objective is to exceed the fixed income investment return, with a lower risk level than what the equity markets hold.

The investment goal is achieved and the investment risks are managed through proactive portfolio management between different investment objects by investing in equities, alternative investments and fixed income investments.

In a normal situation, 50% of the investment basket's assets are invested in alternative investments, 40% in equity investments and 10% in fixed income investments.

The share of alternative investments can vary from 0 to 100%, equity-linked investments from 0 to 100%, and alternative investments from 0 to 40%.

The investment basket may invest in derivative contracts in order to improve the efficient management of the portfolio and/or to hedge

against adverse changes in the markets. Derivatives are used to secure the stable development of the unit value of the investment basket. Derivatives can be both sold (written) and bought.

With the exception of alternative investments, the investment basket's holding in a single investment object cannot exceed 20% of its market value.

For fixed income investments, the risk position of the investment basket is monitored based on modified duration, and for other investment objects, the risk position is monitored based on the delta ratio.

The portfolio manager can use the investment object for trading in the marketplace of his or her choice.

Any dividends paid by the investment objects and other returns are added to the value of the investment basket and reinvested in the investment instruments according to the portfolio manager's investment policy.

Risk profile of the investment basket

The investment basket has a high return risk and capital risk. Return risk and capital risk mean that investors may lose the capital that they have invested as well as the returns in part or in full.

The value of the investment basket is calculated regularly at the current market values of the investment objects it contains. Price changes in the equity, foreign exchange and fixed income markets and in alternative investment objects are reflected in the value of the basket, which can vary substantially in the short term.

The investment basket's value is calculated in euros. The investor bears the foreign exchange risk for investments other than those denominated in euros.

The investment basket is not covered by the Investors' Compensation Fund or the Deposit Guarantee Fund.

Targeted investors

The investment basket suits investors who are saving for their retirement, seek a higher return than that of fixed income investments and accept the risk of losing capital and returns.

Investment object's fees and expenses

The annual management fee for the investment basket is 1.20%.

The investment basket's fixed annual management fee and possible other expenses associated with investments, including safe custody expenses, subscription and redemption fees, trading costs and any taxes and other public charges, will be deducted daily from the value of the investment basket when the value of the unit is calculated; the policyholder will not be charged separately for these.

Due fees for mutual funds, investment baskets and other investment objects that may be the investment targets will be charged. These fees are taken into account in unit value calculations.

Calculation of the investment basket's value

The value of the investment basket is calculated by deducting the liabilities of the investment basket from its assets, including management fees and expenses associated with investments. The value of the investment basket is expressed in euros.

Securities, money market instruments and standardised derivative contracts included in the investment basket are valued at the current market value.

The units of investment funds and units issued by collective investment undertakings are valued at the last available value of the unit.

Deposits are valued by taking into account their capital and the accrued interest added to the capital.

The investment basket's currency-denominated assets and liabilities are converted into euros using the reference exchange rates published by the European Central Bank.

Non-standardised derivative contracts, as well as other investment objects for which a reliable and current market value is not available, or if an investment object other than those mentioned above is in question, are valued according to objective criteria.

A price is calculated for the investment basket for the days that Finnish deposit banks are generally open (banking days). Based on any changes, market disturbances or other similar reasons possibly affecting the investment basket's investments, the Insurance Company can interrupt the calculation of the investment basket's value until the calculation of the value can be carried out normally.

Calculation of the unit value of the investment basket

The value of the investment basket unit is calculated by dividing the value of the investment basket by the number of investment basket units in circulation. The value of the investment basket unit may be divided into fractions. An investment basket unit comprises ten thousand (10,000) fractions of equal size. The value of the investment basket unit is expressed in euros.

The latest value of the investment basket unit is available from the Insurance Company and on the Insurance Company's website.

Investment basket unit subscription, redemption and associated restrictions

The subscription of the investment basket's units means the tying of a new payment under the customer's Contract or of already existing savings to the value of the investment basket's unit. The redemption of the investment basket means the withdrawal of the Contract's savings tied to the investment basket or their transference to another investment basket or some other investment object.

The investment basket is open for subscription and redemption once a day.

The Insurance Company is entitled to refuse subscriptions for the investment basket's units. Policyholders are entitled to withdraw their savings in the investment basket in accordance with the Contract's terms and conditions.

The Insurance Company is entitled to refuse a subscription or a subscription order if it has not been provided with the required information for executing the subscription. The Insurance Company can provide more detailed information about how the subscription is carried out from abroad or in a currency other than that in use in Finland at any given time.

The redemption value of the investment basket unit is determined according to the exchange rate for the day on which the required sales of the investment objects have been registered and taken into account in the calculation of the investment basket's value. The redemption value is paid once the redemption has been completed, at the earliest on the banking day following the redemption date. Redemption orders are fulfilled in the order of arrival. The Insurance Company can decide the minimum number of units or the minimum amount in euros to be subscribed for or redeemed at one time.

A redemption order can only be cancelled with the approval of the Insurance Company. The Insurance Company is entitled to restrict withdrawals due to market disturbances or other similar reasons.

Termination of the investment basket

The Insurance Company is entitled to terminate the investment basket. When the activities of the investment basket end, the policyholder must notify the Insurance Company, within the reasonable period assigned by the Insurance Company, of which investment object's performance he or she wants the savings to be tied to. If the policyholder does not do this, the Insurance Company is entitled to transfer the insurance savings tied to the investment basket to other investment objects of its choice.

Ownership of and rights to the investment basket and its units

The policyholder or beneficiaries do not have title or other rights to the investment basket or to its units linked to the Contract. The Insurance Company holds the title to the units of the investment basket and the investment instruments belonging to the investment basket linked to the Contract.

Changes and restrictions on actions concerning the investment basket

The Insurance Company is entitled to restrict investment basket unit redemptions and subscriptions if the restriction is deemed necessary to protect the interests of other policyholders.

The Insurance Company is entitled to change the portfolio manager of the investment basket and make changes to the rules of the investment basket. Changes are reported on the Insurance Company's website.

Taxes and payments to authorities

If, by virtue of the law or an order issued by an authority, the investment basket or investment objects in the investment basket are subject to direct or indirect taxes or other fees imposed by an authority, and which are payable by the Insurance Company, the Insurance Company is entitled to charge the corresponding sum from the investment basket.

The investment basket's investments may be subject to tax costs, which affect the value of the investment object.

Due dates

If a due date referred to in these rules is not a banking day, the due date in question will be considered the first banking day following the due date.

Risks associated with the investment basket

MARKET RISK

Investment objects are affected by market risk, i.e. a risk caused by general economic development; in other words, factors that affect the overall performance of companies operating on the markets and/or that the value of the investment changes as a result of changes in the economic outlook.

RETURN RISK

The performance of the investment basket is dependent on the investment object's performance, which may vary during the investment period. No guarantees can be made concerning the performance of the investment object. The past performance of investments is no guarantee of future performance. Investing in the investment basket is not the same as investing directly in the investment object. The investor

will not necessarily benefit in full from the dividend paid on equities or on equities included in the equity indices.

INTEREST RATE RISK

Interest rate risk results from changes in the value of the investment basket due to a change in the market interest rates.

CREDIT RISK

Credit risk means a loss or the weakening of the financial position due to the issuer of a security or other debtor failing to meet his or her obligations. If the credit risk materialises, the investor bears the risk of losing the investment entirely or in part.

COUNTERPARTY RISK

Counterparty risk arises due to the other party in a financing or derivative contract and materialises if the counterparty is unable or unwilling to meet his or her obligations. If the counterparty risk materialises, the market value of the contract concluded with the counterparty is subject to risk. The investor bears the risk of losing the investment entirely or in part if the counterparty risk materialises due to the insolvency of the derivative counterparty prior to the redemption of the investment.

FOREIGN EXCHANGE RISK

If the investment objects include investments other than euro-denominated investments, changes in exchange rates may affect the performance of the investment object.

LIQUIDITY RISK

The markets' liquidity risk means that investments cannot be or cannot easily be realised or covered at the current market price or that a value cannot be determined for the investments due to the markets' lack of depth or because the markets are not working due to some kind of disturbance. The value of an investment may need to be defined in an exceptional manner at an exceptional time as the result of a market disturbance.

Risks and observations related to unit-linked insurance

Risk is always inherent in investment activities. The performance of unit-linked insurance and capital redemption contracts depends on the performance of the investments selected by the policyholder. The value of the investment objects may rise or fall, and the policyholder bears the risk of the financial consequences of his or her investment decisions and of losing his or her insurance savings. The policyholder should take into account that the past performance of investments is no guarantee of future performance.

The information and calculations concerning the returns, fees and expenses for investment objects do not take into account the expenses for the insurance.

The investment basket is not covered by the Investors' Compensation Fund or the Deposit Guarantee Fund.

Policyholders independently decide on the selection of investment objects in accordance with their own investment objectives, and bear the risk of a depreciation or loss in the value of the insurance savings.

Neither the Insurance Company nor its agents are liable for the performance of the investments or for the selection

of the investments linked to the insurance.

The Insurance Company may change the investments that can be selected for the insurance during the validity of the insurance. Information on investments and related matters is supplied for information purposes only, and cannot be construed as a recommendation to subscribe for, hold or exchange certain investments, or to carry out any other actions affecting the performance of the insurance.

Policyholders must carefully familiarise themselves with the terms and conditions, rules, price lists, product descriptions and brochures relating to the insurance and investment objects before taking out or changing an insurance contract or selecting or changing investment objects.

Changes in legislation, other regulations and official procedures or the decisions of courts of law can affect the business operations, financial position and performance of the Insurance Company as well as the market value of the investments in the Investment Basket. Additionally, the investor bears the risk of changes in taxation affecting the insurance products.

The investment basket is an investment object owned by Mandatum Life that may be linked to unit-linked insurance or a capital redemption contract. The insurance policy or capital redemption contract is granted by and the investment basket is offered by
